

# INSTALLATION MANUAL

## 89040LL

230V | 50/60Hz | IP20 | Adjustable Output  
Adjustable output using DIP switches.

### Specifications

<b>Input Voltage &amp; Frequency</b>	230V AC 50/60Hz
<b>Power Factor</b>	≥0.95
<b>Operating Temperature</b>	Ta: -20°C ~ +60°C    Tc: +90°C

<b>Output Current</b>	400mA	425mA	450mA	475mA	500mA	550mA	600mA	650mA
<b>Output Voltage</b>	6-42V	6-42V	6-42V	6-42V	6-42V	6-42V	6-42V	6-42V
<b>Output Power</b>	2,4-16,8W	2,55-17,85W	2,7-18,9W	2,85-19,95W	3-21W	3,3-23,1W	3,6-25,2W	3,9-27,3W
<b>Output Current</b>	700mA	750mA	800mA	850mA	900mA	950mA	1000mA	1050mA
<b>Output Voltage</b>	6-42V	6-42V	6-42V	6-42V	6-42V	6-40V	6-40V	6-38V
<b>Output Power</b>	4,2-29,4W	4,5-31,5W	4,8-33,6W	5,1-35,7W	5,4-37,8W	5,7-38W	6-40W	6,3-40W

### DALI Wiring Diagram

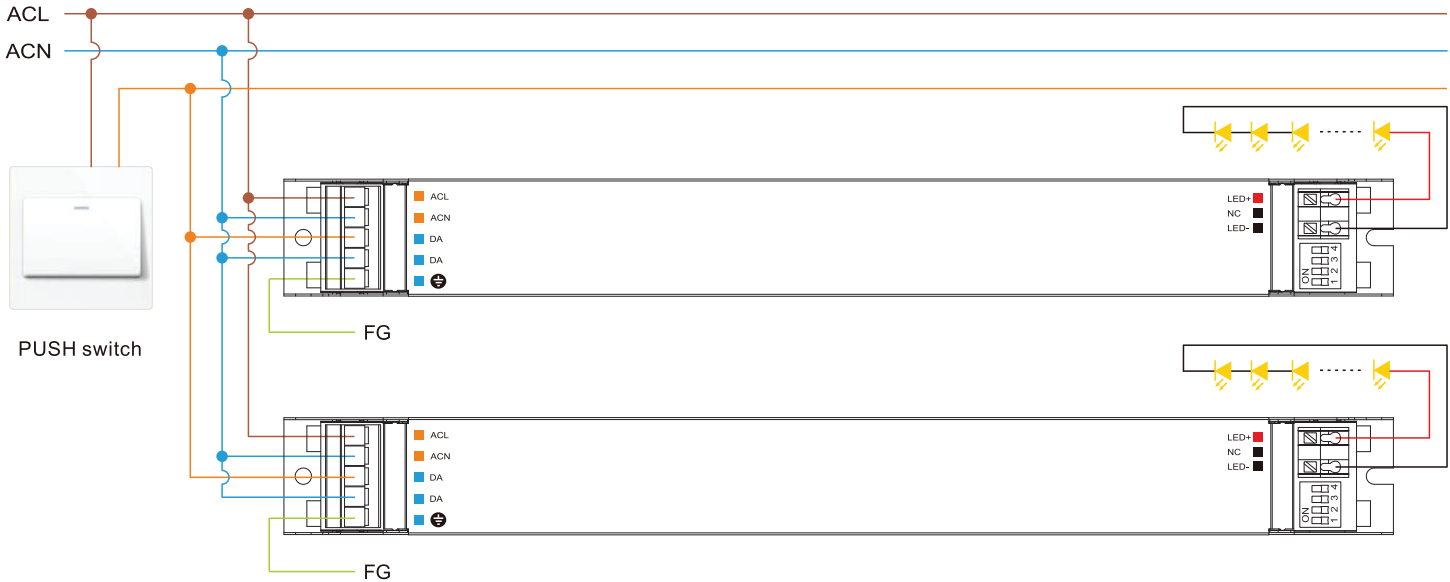

Max. 64 DALI drivers per DALI control line.

#### Warnings:

1. Make sure that the product is installed properly before connecting to electricity.
2. Do not cover the fitting.
3. Maintenance and installation should only be carried out by a professional electrician.

## Push to Dim wiring diagram

## LED Current & Voltage Selection Push to DIM

The driver's output current and voltage can be selected by adjusting the DIP switches.

**Warning:** Before use, make sure the correct output current or voltage is set.

- **ON/OFF:** short push (0,2-1s).
- **Dimming:** press and hold (1-5s).
- **Dimming up or down:** every time you press and hold, dimming changes direction.
- **Built-in memory:** light returns to the previous dimming level when is switched OFF and ON again, even after power failure.

## Synchronization Multiple Lights Synchronize Control Operation

Up to 30pcs LED drivers can be connected to the same push button. This means there is no need for any additional sync cables in large installations, where many drivers should be controlled by one push button. The maximum length of the wires from push to driver should be no more than 20 meters.

Long press the push button for 15s and check that all lights are at the brightest level

### Warnings:

1. Make sure that the product is installed properly before connecting to electricity.
2. Do not cover the fitting.
3. Maintenance and installation should only be carried out by a professional electrician.
